## Generation of Hot Melt Machines

**Monti Antonio S.p.A.** ([www.montiantonio.com](http://www.montiantonio.com)) has released a generation of hot-melt machines, the 908 Hot Melt Modular.

ermoprinting and laminating machine manufacturer based in Thiene, Italy, has designed a new version of its hot-melt machine with the ability to exchange two modules: a full coating module and an engraved cylinder one, depending on the customer needs.

## Intermot Hydraulic Motors Serve a Wide-Range of Applications

axial piston hydraulic motor producer **Intermot S.r.l.** ([www.intermot.com](http://www.intermot.com)) is based in Modena, Italy, but has a presence through its subsidiaries in the group. Intermot produces a large range of drives,

from 100 cc to 8500 cc displacement, two-speed motors and tailored units to meet customers' specific requirements. Intermot's motors are available for several applications, including agricultural machinery, shredders, drilling machines, conveyor belts and also marine machinery. The company's products are suitable for high- and low-speed conditions.

## Mario Crosta Introduces Energy-Efficient Sueding Machine

**Mario Crosta S.r.l.** ([www.mariocrosta.com](http://www.mariocrosta.com)) has installed hundreds of finishing and ennobling fabrics machines in the U.S. Recently, the company invested in resources to simplify the machines to offer "ready-to-use" models with low maintenance levels.

Mario Crosta's new sueding brushing machine Lisa 4 replaces a previous six brushes-on-drum mode. The Lisa 4 uses four big brushes that operate at a high speed. The machine uses 20% less energy than the previous model. The machine fits into Mario Crosta's dedication to sustainability.

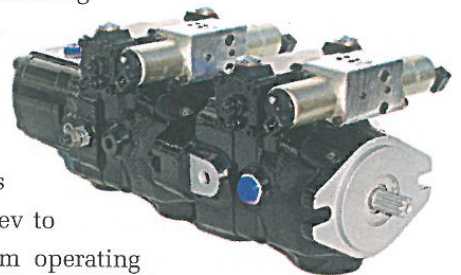

## Tonello Washing Machines Follow the Latest Fashion Trends

**Tonello S.r.l.** ([www.tonello.com](http://www.tonello.com)) has been designing and manufacturing garment finishing technologies since the early 1980s. With a keen eye on fashion trends, the company began by producing side-loading washing machines to meet fast-growing demand for stone-wash finish apparel. Tonello, based in Vicenza, Italy, diversified its production to include its automatic Brush Robot and laser equipment for garment marking.

## Hansa-TMP Launches New Pumps for Mobile Equipment Markets

The hydraulic division of Modena, Italy-based **Hansa-TMP S.r.l.** ([www.hansatmp.it](http://www.hansatmp.it)) has introduced several new products for the mobile-equipment markets, including a new range of TPV closed-loop system variable displacement axial piston pumps and motors.

The new TPV series pumps offer displacement of 6 cc/rev to 110 cc/rev with a maximum operating pressure of 450 bar at a top speed of 3,900 rpm. These units provide high-power density, a key requirement of most mobile applications.
