ECOLOGICAL TECHNIQUES

Cotton Incorporated

Tonello

Garment Finishing Technologies

The textile industry demands innovation in processing, fashion, design, performance and sustainable practices. Cotton Incorporated is at the forefront of identifying, evaluating and marketing the latest in cotton textile innovations. In a recent collaboration, Cotton Incorporated and Tonello SRL (www.tonello.com) produced a creative collection of fabrics using a combination of Tonello garment processing equipment and Cotton Incorporated cotton fabric developments. The collaboration highlights the capabilities of machinery to incorporate ecological practices into the production of fashionable cotton designs.

COLLABORATION

VERSATILITY
More operations with the same machine.

HIGH SPEED
Improved dyestuff penetration, quality and reproducibility.

DECREASE PROCESSING TIME
Reduce the number of intermediate steps.

LOW IMPACT PROCESSING
Low liquor ratio processing reduces water, energy and chemistry consumption.

G1 Jet Garment Dye Machine - Flexible Eco-Dye system. Capable of running standard dye jobs or innovative dye techniques.

Kit Batik Dye System™ - A special technology that can be applied to all Tonello washers and dye machines. This patented system has the ability to apply creative dye effects such as tie-dye, rain finishing, spotting and vintage looks. Auxiliaries and dyes are precisely applied, reducing the overall inputs of water, energy and chemistry.

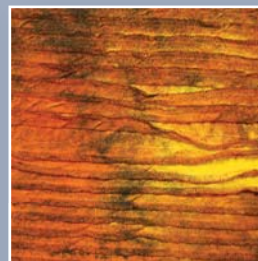

Laser Blaze™ - Utilizes laser technology to create inspiring designs and vintage looks.

TECHNOLOGY

Fashionable collection of cotton fabrications.
