(<http://www.apparelresources.com/wp-content/uploads/2014/11/17.gif>) Known for replicating production processes closely for sampling, Tonello's sampling machines come with the latest generation microprocessors, stainless steel structure, scratch resistant tempered glass, USB mechanisms for transferring recipe data and third-party management system interfaces. The Italian manufacturer's latest range of sampling machines –G1 is RINA tested and ACIMIT certified. G1 16, 35, 60 have been designed for dyeing tests, dyeing and washing and dyeing and washing testing tests respectively. G1 70 on the other hand is touted to be ideal for testing and perfecting the various washing and dyeing cycles. G1 70 is available in models LW and LW1 for different minimum loads and comes with kits like ECOfree and Ofree for ozone processing, Kit Batik for special dyeing and finishing effects, Nitrogen for eco-friendly dyes with sulphur colorants that can be retrofitted to production machines even.
